

## **HELICOPTER NOISE COMPLAINT REVIEW COMMITTEE**

**The helicopter noise complaint review committee meets once per month. The volunteer group is comprised of representatives from homeowners associations and representatives from the local helicopter industry. Committee members review the previous month's helicopter noise complaint data from the ACS. The more egregious incidents are investigated. The details and circumstances surrounding those incidents are later shared with the committee. If warranted the pilot will be re-educated by their supervisor regarding the importance of "Flying Neighborly" and reducing the noise impact of their aircraft.**
